

Map Maker

Let's create a **BRAND NEW TOWN**, and make it a great place for everyone to live! As you create, think about what people need, and how you can add things to the town that help others. **FIRST**, name your town. It can be a totally made up name!

THEN, think about the landscape of the town: are there mountains, forests, rivers? What buildings are there? What things do people need to live? Decide on a symbol to represent each thing and put it in the **MAP KEY**. Next, you can draw in all the features of your town on your map!
